

TESTIMONIAL

HAY — ROBERT AND LARISA STEWART, LOUISIANA (2011)

Robert and Larisa Stewart traveled from Louisiana to attend our third quarter seminar in Hattiesburg, Mississippi. Robert charmed and entertained our attendees as he recounted the story about his “infamous hay.”

Robert and Larisa began using SumaGrow® in 2008 after reading an article in Popular Science titled “The Future of Farming: Eight Solutions for a Hungry World,” where the technology of SumaGrow® was a featured solution. After treating his fields with SumaGrow®, the forage grew in earlier and thicker, with more even coverage. Although he knew the quality of his hay had greatly improved, he was surprised when his hay became so widely well-known.

“I got a call from a man in central Texas asking me if I could sell him some hay,” Robert laughed. “Man, do you know where I live and how far that is from you?” Another man called him from southern Mississippi asking him the same question. They had heard about the quality of his hay and distance wasn’t a problem.

“All I can say is that this product really works,” Robert said.
