

# TESTIMONIAL

## ORNAMENTALS

*Sent from Steve Elwell, President of SumaGreen, a company licensed to sell products containing SumaGrow®. The winner also happens to be Steve's daughter:)*

Last night SumaGreen {SumaGrow® inside} won First Place in the Science Fair that had over 125 participants. Pictures are attached of the winner.

I do not think Popular Science has anything on this team of future Scientist Kylie Elwell. :)

It was done against fertilizer using 10x10x10 for plants since the project was on marigolds. We planted 8 seeds in each container with control (nothing but water), fertilizer and SumaGreen Ag {SumaGrow® inside}.

SG Ag had 8 for 8 in seed germination, Fertilizer was 3 for 8 (and 2 weeds) and control was 1 for 8.
